

HARITHA B

Gen AI Developer | AI Engineer

+91-9840346529 | haritha24072004@gmail.com | <https://www.linkedin.com/in/harithabalaji/> | <https://github.com/Haritha705>

PROFILE

Generative AI enthusiast with hands-on experience in building **LLM-powered applications, Retrieval-Augmented Generation (RAG) pipelines, and AI agents with tool calling** using **LangChain, FastAPI, and vector search**. Skilled in integrating **Gemini and Groq LLMs**, developing scalable AI backends, and creating end-to-end Generative AI solutions. Seeking an entry-level **GenAI Engineer, AI Application Developer, LLM Engineer, or RAG Developer**.

SKILLS

Generative AI & LLM: LangChain, Retrieval-Augmented Generation (RAG), OpenAI / LLM APIs, Prompt Engineering, Vector database

Programming: Python, TypeScript, SQL (Joins, Aggregations), Pandas, NumPy

Databases : MongoDB, ChromaDB

Backend & Frameworks: FastAPI, REST APIs, React

Automation : Twilio, Make, Git, GitHub, n8n

Data Visualization: Power BI, Tableau, Microsoft Excel (Pivot Tables, VLOOKUP, Power Query)

Soft Skills: Analytical Thinking, Problem Solving, Client Communication, Collaboration, Business Acumen

EDUCATION

B.Tech Information Technology

Graduation: 2026

Panimalar Engineering College, Chennai City Campus, Nungambakkam | CGPA: 8.9

INTERNSHIP

MERN Stack Intern — Altruisty Pvt. Ltd., Chennai

April 2025 – June 2025

- Developed and deployed a full-stack HRMS application (MongoDB, Express.js, React, Node.js) with a responsive frontend and robust backend integration, improving HR efficiency by 25%.

PROJECTS

AI Resume & Interview Question Generator

July 2026

Python, LangChain, RAG, OpenAI/LLM APIs, Edge TTS

- Built a Retrieval-Augmented Generation (RAG) pipeline using LangChain and an LLM API to generate tailored interview questions from a candidate's resume and job description.
- Parsed resume and job description text into structured embeddings to enable context-aware retrieval and more relevant, role-specific question generation.
- Integrated a voice-based assistant using Edge TTS with LangChain to deliver generated interview questions through natural speech output, simulating a real interview experience.

Skill Swap

May 2025 – June 2025 | Live demo

React, Node.js, MySQL

- Built a real-time skill-sharing platform enabling users to connect, chat, and exchange skills through an intuitive interface.
- Designed a React-based frontend with live video calling and screen sharing for seamless peer-to-peer collaboration.
- Developed a Node.js and MySQL backend to manage user profiles, skill listings, and session data, and integrated WebSockets to boost efficiency by 20%.

Disaster Alert Application

Flask, Google Maps API, Twilio

- Built a disaster alert system with real-time location tracking using Google Maps API integration to pinpoint affected areas.
- Designed a Flask backend to process incoming alerts and manage location-based data efficiently.
- Enabled real-time SMS notifications using Twilio, allowing emergency alerts to reach users instantly.

Career Path Predictor

Python, Flask

- Delivered a system to generate personalized career recommendations based on user-provided input such as skills and interests.
- Built a Flask-based interface to collect user input and display recommendations in real time.

CERTIFICATIONS

- AWS Cloud Foundations – AWS Academy
- Data Analytics – ACTE Technologies
- Information Security Practitioner Course — TCS iON (2025)
