PROFESSIONAL SUMMARY

Aspiring GenAI Engineer with hands-on experience building LLM-powered applications, RAG pipelines, and tool-calling AI agents using LangChain, FastAPI, and vector search. Skilled in integrating multi-provider LLMs (Groq, Gemini), designing agentic workflows, and shipping full-stack AI products end-to-end. Seeking an entry-level GenAI Engineer, AI Application Developer, or RAG Developer role.

TECHNICAL SKILLS

- Programming Languages: Python, C, JavaScript
- Frameworks & Libraries: FastAPI, LangChain, Langgraph, LiteLLM, React, Next.js, Bootstrap
- GenAI / LLM Concepts: RAG, Prompt Engineering, Tool/Function Calling, AI Agents, Vector Embeddings, Semantic Search, Model Context Protocol(MCP)
- Databases: MongoDB Atlas (Vector Search), SQL, MySQL
- Automation: n8n, Make.com
- Tools & Platforms: Git, GitHub, VS Code

PROJECTS

College Syllabus Chatbot (RAG-Based Q&A System with LangChain Agents)

Python, FastAPI, LangChain, LiteLLM, MongoDB Atlas Vector Search, React/Next.js/[Source code](#)

- **Problem Solved:** Students had to manually search through a 212-page college syllabus to find course and unit details, making lookups slow and inconsistent.
- **Approach:** Built a full-stack RAG chatbot with a hierarchical, structure-aware ingestion pipeline (chunk-type metadata tagging, cosine similarity top-k retrieval), then upgraded it with LangChain to orchestrate an agentic workflow with tool calling instead of a single static prompt chain.
- **Deployment:** Integrated LiteLLM for multi-provider LLM access (Groq, Gemini) with fallback and retry logic; deployed a Next.js frontend on Vercel and FastAPI backend on Render.

AI Chatbot - General-Purpose Q&A Bot

Python, FastAPI, LiteLLM, Gemini/Groq, REST API

- **Problem Solved:** Needed a lightweight backend service that could handle general-purpose conversational queries through a clean API.
- **Approach:** Built a FastAPI backend integrating an LLM via LiteLLM (Gemini, Groq), designing REST API endpoints for chatbot communication and validating them using Swagger UI.

Email Summarizer Automation (Gmail to Telegram)

Make.com, Gmail, ChatGPT, Telegram

- **Problem Solved:** Reading through every incoming email in full was slow and made it easy to miss important messages.
- **Approach:** Built a Make.com workflow that watches Gmail for new emails, sends the content to ChatGPT for summarization, and delivers the summary directly to a Telegram chat for quick review.

INTERNSHIP

Artificial Intelligence Intern, Novitech R&D Private Limited | Remote [Certificate](#)

September 2024 - November 2024

- Completed an applied AI internship covering core machine learning and Generative AI foundations, including supervised learning concepts, model evaluation basics, and an introduction to LLM-based workflows.
- Strengthened problem-solving and analytical thinking through hands-on exercises, building a foundation later applied directly to RAG pipeline design and LLM-based project development.

EDUCATION

BE - Electronics and Communication Engineering, Government College of Engineering, Bargur 2022 - 2026
CGPA: 8.5

HSC, Amala Girls Higher Secondary School, Musiri 2021
Percentage: 90%

SSLC, Government High School, Alagarai 2019
Percentage: 92%

CERTIFICATIONS AND COURSES

- Data Analytics - Online Certification (SQL, Python, Data Visualization) [Certificate](#)
- Generative AI - In Progress (LangChain, LLM Integration, LiteLLM, FastAPI, RAG, Prompt Engineering)
